Cummins College of Engineering, Pune

Bachelor of Technology in Computer Engineering, Distinction

August 2018 - June 2022

Pune, India

WORK EXPERIENCE

Tagline

AI Strategy & Product Intern

June 2026 – Present

Coventry, United Kingdom

- Driving project execution for a 7-member consulting team by managing workstreams, stakeholder communication, meeting cadence, and delivery planning alongside the Founder & CEO.
- Assessing emerging AI products and market trends to generate insights supporting product strategy and growth initiatives.
- Defining user personas and customer journeys to support product positioning and engagement strategy.
- Formulating strategic recommendations by synthesising market research, user insights, and AI industry developments for executive presentation.
- Formulating product strategy recommendations by synthesising customer insights, competitive intelligence, and AI market trends to strengthen product positioning and drive user adoption.

Dell Technologies

Software Engineer 2

February 2024 – August 2025

Hyderabad, India

- Led a cross-functional team of 6 to deliver projects on schedule, coordinating requirements, risks, and timelines with engineering, security, and compliance stakeholders.
- Managed the end-of-life transition of a large enterprise application, creating delivery plans, conducting impact assessments, and engaging with multiple business units to ensure a smooth, risk-controlled change.
- Responsible for improving document accessibility by 30% through structured process mapping and workflow optimization, supporting more efficient operations for engineering and business teams.
- Introduced automation that reduced operational workload by 40%, enabling teams to redirect resources toward higher-value project tasks.
- Strengthened system security through coordinated upgrades and risk mitigation activities, ensuring stable, compliant environments
- Oversaw continuous PCF upgrades, managing release timelines, stakeholder updates, and acceptance criteria to maintain system resilience.

Dell Technologies

Software Engineer 1

August 2022 – January 2024

Hyderabad, India

- Delivered end-to-end project cycles for 4+ business-critical tools, from requirements gathering and stakeholder alignment to release management and adoption.

- Led the development of an internal Order Simulation Tool by translating business requirements from multiple stakeholders into a unified solution, improving workflow efficiency by 30
- Developed features that improved system throughput and cut manual work by 98%, showcasing a strong ability to identify inefficiencies, propose solutions, and lead delivery.
- Authored technical documentation, provided demos to stakeholders, and facilitated smooth handovers.
- Recognized with multiple awards for ownership, innovation, and measurable impact on project outcomes.

Inteliment Technologies

Data Scientist (Internship)

September 2021 – May 2022

Pune, India

- Conducted market-focused data analysis using NLP models, extracted key commercial insights, and reduced report generation time by 40%.
- Explored multilingual text summarization, evaluated market sentiment, and identified opportunities for product positioning.
- Led a team of 4 analysts to translate data findings into strategic recommendations, increasing understanding of market trends among business stakeholders.
